Farmville, Va.

Farmville, Va., June 14.—I have to report the tobacce crop in bad condition. I have taken great pains to find out the quality planted, which is from the best and most reliable information to be had; and it's conceded, not more than 60 per cent of the average crop, has been planted; the past fifteen days have been very unfavorable. Some cool days and nights with scorching sun, have caused about 10 per cent of the planting to die out, and the plant beds burnt out to a great extent, which would cause it quite a hard matter to replant the crop. We have had some little showers of rain, not enough to do any good. Our receipts xery light this week. Receipts for this week 1890, 6,655 which shows def 162,115 pounds.

Chicago Market.

Messrs. Baldwin & Farmim telegraph Thomas Branch & Co. as follows:
Chicago, June Io.—Wheat.—We have a decline of 21½c. to-day in wheat, and the market closed right at bottom. Sentiment has completely changed; bulls have lost heart and money, and it's going to take a good deal of bad crop news or big exports to turn this market. We have had one big advance, and the danger is that this collapse in price may lead to a dull and stagnant market. Wheat is probably not too high at its present price. The question arises now, who is going to buy enough to advance it? Our market looks the weakest just before it is ready for an advance, and the present may be but another example of that condition. Corn.—Good weather and liberal ofterings led to weakness and decline of about ½c. The weakness in wheat naturally helped the decline. Liverpool steady and unchanged. Oats.—Oats have been dull, but steady all day. Provisions.—Provisions weak all day, with very little decline. There has been some little disposition to buy ribs under 5c. While we see nothing to change our minds during this month, while receipts of hogs keep up, we would rather buy than sell. Twenty-five thousand hogs to-morrow. Cash trade dull. Lychburg, Va.

Lynchburg, June 14.—The receipts this week amounted to only 117,100 pounds, increasing the total since October 1, 1884, to 12,375,700 pounds against 16,019,100 pounds during the same period last season. It is estimated now that the total for this season will not reach over lifteen or sixteen milions of peunds against 24,000,000 pounds last season, and consequently over three-fourths of this crop have been sold. We have a small portion of good and desirable to-baccos selling, which are still gaining in strength, and have fetched from 16c. to 18½c, for the best, while some little, suitable for dark wrappers, sold as high as 19½c, and 21c. All grades are in good and general demand at outside prices, and the tone of the market is very strong. The weather is still hot and dry, with no rain for the last three weeks, excepting one light shower, and rain is needed now to improve the stand of the plants. The planting is estimated to be even less than last year, as farmers have been unable to procure the necessary labor, and in some districts only about one-half of acrop has been planted.

Hopkinsville, Ky. HOFKINSVILLE, KY., June 12.—Our market this week was occasionally a little easier, particularly on undesirable kinds, though generally prices ran much the same as last week. Holders are not disposed to accept any decline, and everything that falls materially below recent prices is promptly rejected. Bremen styles are scarce and very high. During the last few days we have had a good planting season, which enables farmers to do their replanting, and to pitch the remainder of the crop. A small proportion of the farmers have not planted as much as they intended, but we do not expect that there will be any further plantings. The area planted is probably not quite as large as it was last year.

Some people suffer if the market goes up, and a great many suffer if it goes down. The market opened strong, and then sold off fractionally. We do not think there has been any radical change in the majority of opinions that the passage of the sitver bill will be a dull argument, but in to-day's there has been an outeropping of the ancient Wall street anti-silver feeling which seemed to have been completely buried when the silver agitation came up in April. Consequently, if an agreement is reached on the silver bill, the effect may not be, as not pronounced as a good many have believed. The relations between Missouri Pacific and Atchison do not appear to be the most friendly, and the tariff bill will be reported to the Senate to-morrow. Everybody wants something to happen to make the market active again.
